

Ursula Schuch, PhD. Professor and Specialist in Environmental Horticulture in the School of Plant Sciences at the University of Arizona in Tucson, AZ.

Dr. Schuch received her MS in Forest Science and her Ph.D. in Horticulture from Oregon State University. Dr. Schuch works with green industry professionals and producers of nursery and specialty crops. Her research and Extension programs address the needs of commercial horticulture professionals. Research interests include abiotic stress, water quality and conservation, production and management practices of plants in the landscape and nursery industry, and specialty crop production with emphasis on minimizing inputs and supporting sustainable practices. Current projects include witches broom of blue palo verde, efficacy of rainwater harvesting, and evaluating pomegranate cultivars for Arizona.
