Specialty: medically important spiders, spider taxonomy, urban entomology

Rick Vetter received a B.S. in Biology from Adelphi University (Long Island, NY) and a M.S. in Zoology from Arizona State University. He spent 32 years as a staff research associate in the Entomology Department at Univ. Calif. Riverside, retiring in 2012. Rick is considered an expert on medically important spiders and the effects of their bites. In regard to this, he has 150 peer-review publications (including the New England Journal of Medicine and JAMA Dermatology), 7 book chapters and 2 books (including "The Brown Recluse Spider" published by Cornell University Press). He has named two spider species and has had two spiders named in his honor in appreciation for his collecting efforts.
